

4.2 Floodplain Management Alternatives Fact Sheets

The Mayor's Floodplain Task Force outlined the following floodplain management techniques for evaluation as possible additions to the City's existing floodplain management program:

No-Net Rise and Compensatory Storage

Property Buyout

Cluster (Open Space) Development

Greenfield Approach

Best Management Development Practices

Floodplain Mitigation

Fact sheets were prepared for each alternative management strategy. Each fact sheet includes a brief description of the management technique, advantages, disadvantages, implementation considerations, example communities, and references for additional information. The fact sheets included on the following pages are intended to be used as both stand-alone documents to educate others and as part of this overall report.
